

8th International Workshop: Micromorphology of Glacigenic Sediments

Monday 2nd - Friday 6th July, 2012

School of Geography, Queen Mary University of London

Convenors: Prof. Jaap van der Meer, Dr Simon Carr (QMUL), and Dr Adrian Palmer (RHUL).

This workshop will provide training in the sampling, production, description and interpretation of thin sections of sediments from a wide variety of environments, with particular focus on glacigenic sediments.

The workshop is intended for research students, early career and established researchers who wish to explore the potential of thin section micromorphology, SEM and 3D-computed tomography within their research.

The workshop is limited to 18 delegates, and will cost £250 (£150 for postgraduates); on-campus accommodation is available at QMUL. For more details, please contact the Centre for Micromorphology (geog-cfm@qmul.ac.uk), or look on our website <http://www.geog.qmul.ac.uk/research/centres/micromorphology/index.html>.

Professors John Menzies & Jaap van der Meer are also convening a one-day workshop on glacigenic sediments during the 14th International Working Meeting on Soil Micromorphology, Lleida, Spain, 8th-14th July 2012. Please contact John Menzies (jmenzies@brocku.ca) for details.
