

WORKSHOP ON ANTARCTIC METEOROLOGY AND CLIMATE

The 18th WAMC is a hybrid meeting bringing together those with common interests in Antarctic meteorology, climate, forecasting and related disciplines. The three-day event will focus on observational networks, numerical modeling, weather forecasting, operational/logistical interests, and Antarctic meteorological and climate research from contributors around the world. Additional sessions will focus on the Year of Polar Prediction - Southern Hemisphere.

WHEN AND WHERE?

May 31 - June 2, 2023

Pyle Center at University of Wisconsin-Madison
702 Langdon Street
Madison, WI 53713
